Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 06 January 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

1. The preliminary amendment filed 1/6/04 has been entered.

Claim Objections

2. Claim 9 is objected to because of the following informalities: there appears to be a typo in line 4 ("collimator **us** turned on"). Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1-12 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claims contain subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The applicants have disclosed only a mechanical switch which is not by itself capable of performing the claimed functions without associated logic circuitry which has not been taught.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as failing to set forth the subject matter which applicant(s) regard as their invention. It is not understood what is meant by "the collimator is turned on" and "an X-ray unit is performed".

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Makrinos et al. (USPN 5,206,894).

9. With respect to claims 1 and 2, Makrinos et al. disclose a remote control handswitch (12) for a portable X-ray unit (14), comprising: a switch (16) formed of a standby and execution button; a handswitch housing (19) having the switch on an upper side of the same, wherein a multi-function operation is performed based on a click operation of the switch (column 4, lines 43-60), wherein the remote control handswitch further includes a remote controller. Makrinos et al. do not disclose the switch is a two-step switch. However, the switch operates like a two-step switch in that it performs different functions depending on how many times the switch is pushed or clicked (column 4, lines 43-60). It would have been obvious to one of ordinary skill in the art at the time the invention was made to use a two-step switch in place of the switch used by Makrinos et al., because a two-step switch is easier to use/click.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Telymonde et al. (USPN 5,555,120), Haumann et al. (USPN

6,285,742 B1), Ali et al. (USPN 6,801,594 B1), and Codina et al. (USPN 4,170,735)

disclose remote controllers for X-ray units.
